

---

Are you looking for a new, free game to play? Have you been searching high and low but are not able to find one that meets your needs? The search is over! This post will tell about the best free games that are available. You'll be able to find something for everyone: from kids and adults to hard-core gamers. This blog post will provide information on some of the best-known and most popular games - we're talking everything from racing, strategy, RPG's, puzzle solvers - but also some lesser known ones. So if you're not feeling like playing one of these games, or if there's a specific genre or type of game that you prefer (i.e. real-time strategy, Pokemon), the post will help you find the game that appeals to you. I will write about some specific genres or styles of games, particularly if it is not necessarily obvious what genre a game belongs to. I'm also going to focus on free-to-play games, which are very popular due to their simple mechanics and lack of upfront investment for gameplay. Or at least that's how I'll be focusing on this blog post! Note: The links in this post are not necessarily affiliate links. All phrases are taken from the app description page, even though I do receive a small commission for each sale if it is an affiliate link. This does not affect my opinion in any way. Before I start, I have some pre-requirements that I will be making reference to throughout this blog post. The games on the list are all completely free. That means there are no in-game items, currency or upgrades to purchase. There may be some advertisements between levels, but this is more of a nuisance than anything else at the moment. However, if you choose to use banners or ads on your own site or blog, you will not receive any compensation for your sales from the app developers. Some of these games are on older platforms (i.e. Windows Mobile), but they are still updated and playable on the latest OS. I have tried to include a range of different games so that there is a little bit of everything in this list. If you have a favorite game that is not included in the list, feel free to mention it in the comments section below! Now let's get down to business - these are my suggested best free games for your device: 1. Real Racing 3 by EA GAMES

"Real Racing 3" is a racing simulation app with over 60 licensed cars from world-class manufacturers such as Porsche, BMW, Aston Martin and many more. It features a number of different game modes, such as: time trials, multiplayer, events and many more. You can connect with other players and race them as well as share the experience on social media. I would recommend this game to any racing enthusiast - but even if you're not a fan of the genre, I would still recommend this simulation app because it's really fun and beautiful! It has come a long way since its inception and it's only getting better and better with each new update.

"Kingdom Rush Origins" is a strategy tower defense game that will keep you occupied for hours.
