. . . a collision course towards a terrifying discovery about the true nature of reality. It's a long road back for Riley, and it will take a lot more than a Martian invasion to stop her. If you can call that having your mind wiped. "Hollywood at its best."
–Booklist, starred review "Once you start this story, it's hard to stop." –Publishers Weekly, starred review
The Light Between Oceans by Australian author M.J. Hyland is a novel of astonishing originality and craftsmanship. Like the best science fiction and thriller novels, it is most effectively read in small installments. I plan to re-read this excellent tale again and again. The Light Between Oceans is a tear jerker, but it is also a story of hope and the value of family ties. Even though many of the characters in the story are strangers to each other at the beginning of the novel, they quickly find a common bond of caring and respect. I loved the characters in The Light Between Oceans and was drawn into the lives of the characters that I met in the pages of this book. I would highly recommend this novel to any of the readers that enjoy their novels set in the Pacific Northwest. "What a great family story." –The Irish Post "I highly recommend this book. It will both break your heart and lift your heart at the same time." –Caitlyn Maus See what you think about The Light Between Oceans by clicking here! It was the best of times. It was the worst of times. It was the age of wisdom. It was the age of foolishness. It was the epoch of belief. It was the epoch of incredulity. It was the season of Light. It was the season of Darkness. It was the spring of hope. It was the winter of despair. Earth Unaware by David Gerrold is a novel set in the distant future that combines the best elements of many different time travel stories. It is a future that I can only describe as futuristic. The inhabitants of Earth have come to realize that there are many dimensions to the universe and are starting to experience them. The higher dimensions are not much different from our own. I found myself wondering what it would be like to experience the universe in the future
